ABOUT THE COMPANY

Exceed is a game-changing solution designed to streamline hotel operations. With its user-friendly interface, real-time booking management, and powerful reporting tools, it makes running a hotel smoother and more efficient. It helps boost occupancy rates, optimize revenue, and enhance guest experiences all while saving time.

EXCEED EXPECTATIONS, EVERY TIME.

WHY CHOOSE EXCEED?

Key Benefits:

- Increased Efficiency
- Higher Revenue
- Improved Guest Experience
- Streamlined Operations

EXPERIENCE THE DIFFERENCE

On-premise and Cloud based

On-premise is a desktop based PMS whereas Cloud based (recommended) or online hotel software is next generation software, which allows you to monitor your hotel business from anywhere at anytime.

Hoteliers are moving towards cloud based software where hotel or hotel groups can effectively simplify and organize their departments core operations by replacing the traditional methods of hotel keeping. Here's why:

Cloud Based	On-premise
• No need of any hardware requirements.	• Requires a specific set of hardware.
• One-time setup fee and annual or monthly subscription charges.	• Annual Maintenance Costs (AMC) charges.
• Accessible via a secure login from any computer or mobile device connected to the Internet.	• Accessible only from the system on which it is configured.
• Easy and timesaving updates.	• Time-consuming updates.
• Data is secured on the cloud.	• Data security is the property's responsibility.

Excellence in Every Solution

CLOUD BASED
SOFTWARE FEATURES:

Room Reservation

Front Office Management

Point of Sale

Material Management

Food and Beverages costing

Banquet and Conference

Housekeeping

Financial Accounting

Guest Profile Management

User Role and security control

Room Reservation

- Real-time room availability updates.

- Simplified hotel operations.

- Automated confirmation emails.

- Reliability and security from a cloud platform.

- Systematic guest profile and easy bookings.

- Mobile-friendly reservation interface.

Front Office Management

- Unified dashboard for guest and room management.

- Automated check-in and check-out processes.

- Real-time updates on guest requests and room status.

- Automatic billing and invoicing integration.

Point of Sale (POS)

- Seamless integration with guest billing.

- Real-time sales tracking from all outlets.

- Easy menu and pricing updates.

- Automated inventory tracking and stock alerts.

- Secure, PCI-compliant payment processing.

- Table and area management and reporting.

Material Management

- Real-time inventory tracking and updates.

- Automated purchase requisitions and orders triggers.

- Centralized management of all materials.

- Supplier integration for efficient ordering.

- Cost tracking for materials and supplies.

- Periodic inventory audits for accuracy.

Food and Beverages Costing

- Accurate recipe and ingredient cost tracking.

- Monitoring of food and beverage costs.

- Menu item profitability analysis.

- Waste tracking and reduction tools.

- Integration with POS for accurate usage data.

- Cost control through inventory and procurement data

Banquet and Conference

- Real-time management of event bookings and space availability.

- Effortless scheduling and resource allocation.

- Simplified invoicing and payment processing for event-related charges.

- Automated event reminders and communication with guests and staff.

- Integration with event management tools for a seamless experience.

- Cloud-based reporting to track event success and financials.

Housekeeping

- Real-time tracking of room status (clean, dirty, in-progress).

- Task assignment for housekeeping staff directly via the cloud.

- Automatic notifications to housekeeping for room readiness or issues.

- Streamlined coordination between housekeeping and front desk for room assignments.

- Detailed reporting on room turnovers and staff productivity.

- Cloud-based inventory management for cleaning supplies and equipment.

Financial Accounting

- Real-time financial data updates and reporting.

- Automated profit & loss and balance sheet reports.

- Allocate expenses across various hotel departments.

- Budgeting and forecasting tools.

- Compliance with financial regulations and audit trails.

- Secure cloud storage for financial records.

Guest Profile Management

- Centralized guest data storage and access.

- Personalized guest services based on preferences.

- Profile updates and access.

- Segmentation for targeted marketing campaigns.

- Mobile access for staff to manage profiles anywhere.

User Role and security control

- Role-based access with customized permissions.

- Multi-factor authentication for secure logins.

- Detailed audit trails of user activities.

- Data encryption for sensitive information

- Remote access control for management.

- Customizable user roles to fit operational needs.
